

This handbook gives an overview of basic facts about HypoPARathyroidism, its diagnosis, and typical treatment options. While this handbook contains important information about HypoPARathyroidism, the patient's individual course of testing, treatment, and follow-up may vary for many reasons.

Writers, Editors, and Reviewers. This handbook combines the significant efforts of Members of HypoPARathyroidism Association's Medical Advisory Board and the association's board. We greatly appreciate everyone's expertise and support.

Medical Advisory Board.

The HypoPARathyroidism Association is fortunate to have a distinguished Medical Advisory Board of more than 8 professionals, who are world recognized experts in HypoPARathyroidism. They provide valuable counsel and support of the association's goals in education, treatment and research. Our web site www.hypopara.org has details

Funding. This handbook was funded through donations from individual contributors and by unrestricted educational grants. Thank you.
