

# PATTH STUDY

## FOR HYPOPARATHYROIDISM

UCSF is recruiting participants for an innovative study that involves the treatment of **hypoparathyroidism**.

The study involves the transplantation of deceased donor parathyroid gland tissue into the forearm of study participants.

**The goal is to stabilize parathyroid hormone levels to treat hypoparathyroidism while also regulating calcium levels.**

- Must be age 18 or older
- Must be willing to travel to San Francisco, CA for all 20 study visits
- Have a diagnosis of hypoparathyroidism
- Must be willing to take immunosuppressant medication
- Must commit to 1 – 5 years of follow-up at UCSF
- Must meet all inclusion criteria to be eligible
